All flavored syrups are not created equal

There are lots of flavoured syrup products out there, but they're not all suitable for use with coffee. MONIN syrups are formulated specifically for use in coffee-based drinks. They contain just the right amount of pure cane sugar to give your coffee a sweet taste without overpowering the flavor of the syrup or the coffee.

There's a lot more to coffee syrups and their applications than you might think. That's why we've created this informative and educational guide, especially for you;

Caramel syrup

The rich, sweet, and buttery smoothness of caramel has come a long way from chewy wrapped candies. Our Caramel Syrup delivers mouth-watering decadence to your favourite hot or cold coffee beverages, milkshakes, coffee cocktails and more. Hands down this is definite best seller!

Vanilla syrup

Using pure Madagascar vanilla ensures that our Vanilla Syrup will bring high-quality, rich flavor to drinks and desserts. This popular, versatile flavour brings smooth warmth to beverages of every kind. Monin Vanilla Syrup adds rich, smooth flavour to lattes, mochas, smoothies, shakes, specialty cocktails or even whipped cream.

Hazelnut syrup

The perfect pairing for coffees and chocolates, the nutty taste of caramelized hazelnut is a culinary and beverage mainstay. Our Hazelnut Syrup adds rich, nutty goodness & perfects a wide range of beverages, from mochas and lattes to smoothies, shakes and coffee inspired cocktails.

Also, you might want to invest in a 5 or 10ml Syrup Pump. A pump will help to eliminate any sticky mess on your countertop and increase speed of service of your staff.

If you like your food all-natural, MONIN products are the way to go. Monin syrups are suitable for vegans, GMO, gluten, and dairy-free, and Halal & Kosher too. Only natural ingredients, including real fruit, nut and botanical extracts, are used to create a wide range of flavours – no artificial preservatives or flavours here, thank you.
